Program Management

Engineering teams increasingly working in a distributed setting can use this module to streamline product programs. All communication (**projects, attributes, tasks, discussion-boards**) is versioned and archived in database for easy search and lookup. Share your **CAD models, BOM, Requirements documents** or create and assign **Tasks** to anyone with an email id. With no additional burden on your IT department, sign up for the easiest-to-use Program Management solution on the planet without breaking your budget.

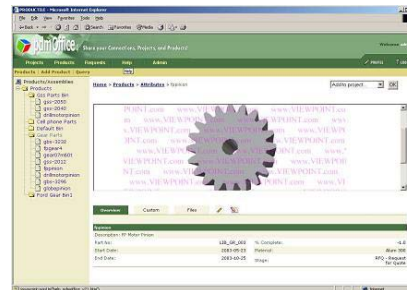

- Manage your offshore partners
- Version control/Archive CAD data
- One-Click Integration with MS Outlook Contacts & Tasks
- Document & Task Management
- Discussion Board per project
- Industrial-strength security

Product Collaboration

Today, products rely not only on extremely complex technology but also on an intricate network of supply-chain partners, especially for **custom design and prototyping**. Tight integration with existing CAD packages such as **SolidWorks, Inventor, Pro/E, Unigraphics**, as well EDA packages such as Cadence **OrCAD**, Mentor **BoardStation**, and **Zeuken**, makes communicating and sharing with your peers a breeze.

- Manage complex CAD models
- BOM, drawings, Requirements
- Version control/Archive CAD data
- Discussion Board per product
- Support for CAD Attributes
- Custom Attributes supported
- Stage-gate process support
- Industrial-strength security

Application Sharing

PDMOffice Collaboration suite allows you to manage the complex technical information through its CAD-centric Application Sharing, White-boarding, and Instant Messaging environment. PDMOffice has introduced the **first of its kind** collaboration suite for engineers which offers state-of-the-art communication features in a CAD-centric environment for Program Management and Product Collaboration.

- Application Sharing
- White-boarding
- Instant Messaging
- Archiving and Transcribing
- One-Click integration with rest of the collaboration suite
- No additional burden on your IT dept. – managed by PDMOffice
